

Assignment8

Using mongoose defines the following collections (Sticky Notes) (10 Grades):

Users (0.5 Grade)	Notes (0.5 Grade)
• name (String, required) • email (String, Unique, required) • Password (String, required) • Phone (String, required) • age (Number) (Must be between 18 and 60)	• title (String, required) • content (String, required) • userId (ref to Users, required) • createdAt (Timestamp) • updatedAt (Timestamp)
Must Implemented: 1. Add a custom validator to the “title” field that ensure the title is not entirely uppercase. For example (“FIRST NOTE”) (“First Note”). (0.5 Grade)	

APIs (Ensure you apply the folder structure we discussed)

A- User APIs (2.5 Grades)

1. Signup (make sure that the email does not exist before) . (0.5 Grade)

- URL: POST /users/signup

```
{
  "message": "Email already exists."
}
```

```
{
  "message": "User added successfully."
}
```

2. Create an API for authenticating users (Login).(Get the email and the password from the body). (0.5 Grade)

- URL: POST /users/login

```
{
  "message": "Invalid email or password"
}
```

3. Update logged-in user information (Except Password). (If user want to update the email, check the new email doesn't exist before. (Get the id for the logged-in user from query params) (0.5 Grade)

- URL: PATCH /users/:id

Input

Output

```
{
  "name": "updated",
  "email": "updated@email.com",
  "age": 30
}
```

```
{
  "message": "User updated",
}
```

```
{
  "message": "User not found"
}
```

```
{
  "message": "Email already exists."
}
```

4. Delete logged-in user. (Get the id for the logged-in user from query params) (0.5 Grade)

- URL: DELETE /users

```
{
  "message": "User deleted"
}
```

```
{
  "message": "User not found"
}
```

5. Get logged-in user data by his ID. (Get the id for the logged-in user from query params)(0.5 Grade)

- URL: GET /users

```
{
  "_id": "64d91c42d8979e1f30a12345",
  "name": "User1",
  "email": "User1@email.com",
  "password": "$2b$10$0qCjH.AxhjF2gYZGQIHyb08cm3fr0ZNRb/xj9fJPTJS5xEUHVfH9u",
  "phone": "U2FsdGVkX19kIeLZa1txT5N7XzQ21tNlFSKkJmInAfA=",
  "age": 25
}
```

Assignment8

B- Note APIs (6 Grades)

1. Create a Single Note (Get the id for the logged-in user from query params) (0.5 Grade)

- URL: POST /notes

```
{
  "title": "Note1",
  "content": "this content for note1"
}
```

```
{
  "message": "Note created"
}
```

2. Update a single Note by its id and return the updated note. (Only the owner of the note can make this operation)
Get the id for the logged-in user from query params).(0.5 Grade)

- URL: PATCH /notes/:noteId => /notes/64d91c42d8979e1f30a12346

```
{
  "title": "updated",
  "content": "update content"
}
```

```
"message": "updated",
"note": {
  "id": "64d91c42d8979e1f30a12346",
  "title": "updated",
  "content": "update content",
  "userId": "64d91c42d8979e1f30a12345",
  "createdAt": "2024-12-14T12:00:00.000Z",
  "updatedAt": "2024-12-14T12:30:00.000Z"
}
```

```
{
  "message": "You are not the owner"
}
```

```
{
  "message": "Note not found"
}
```

3. Replace the entire note document with the new data provided in the request body. (Only the owner of the note can make this operation) (Get the id for the logged-in user from query params).(0.5 Grade)

- URL: PUT /notes/replace/:noteId=> /notes/replace/64d91c42d8979e1f30a12348

```
{
  "title": "updated",
  "content": "update content",
  "userId": "64d91c42d8979e1f30a12839"
}
```

```
{
  "id": "64d91c42d8979e1f30a12348",
  "title": "updated",
  "content": "update content",
  "userId": "64d91c42d8979e1f30a12839",
  "createdAt": "2024-12-13T16:00:00.000Z",
  "updatedAt": "2024-12-13T16:30:00.000Z"
}
```

```
{
  "message": "Note not found"
}
```

```
{
  "message": "You are not the owner"
}
```

4. Updates the title of all notes created by a logged-in user.) (Get the id for the logged-in user from query params) (0.5 Grade)

5. • URL: PATCH /notes/all

```
{
  "message": "All notes updated"
}
```

```
{
  "message": "No note found"
}
```

6. Delete a single Note by its id and return the deleted note. (Only the owner of the note can make this operation) (Get the id for the logged-in user from query params) . (0.5 Grade)

- URL: DELET /notes/:noteId => /notes/64d91c42d8979e1f30a12346

```
{
  "message": "deleted",
  "note": {
    "id": "64d91c42d8979e1f30a12346",
    "title": "updated",
    "content": "update content",
    "userId": "64d91c42d8979e1f30a12345",
    "createdAt": "2024-12-14T12:00:00.000Z",
    "updatedAt": "2024-12-14T12:30:00.000Z"
  }
}
```

```
{
  "message": "Note not found"
}
```

```
{
  "message": "You are not the owner"
}
```

7. Retrieve a paginated list of notes for the logged-in user, sorted by "createdAt" in descending order. (Get page and limit from query parameters) (Get the id for the logged-in user from query params). (0.5 Grade)

- URL: GET /notes/paginate-sort=> for example /notes/paginate-sort?page=2&limit=3

```
{
  "id": "64d91c42d8979e1f30a12346",
  "title": "Meeting Notes",
  "content": "Discuss project updates",
  "userId": "64d91c42d8979e1f30a12345",
  "createdAt": "2024-12-14T12:00:00.000Z",
  "updatedAt": "2024-12-14T12:30:00.000Z"
},
{
  "id": "64d91c42d8979e1f30a12347",
  "title": "Shopping List",
  "content": "Buy groceries and snacks",
  "userId": "64d91c42d8979e1f30a12345",
  "createdAt": "2024-12-14T10:00:00.000Z",
  "updatedAt": "2024-12-14T10:30:00.000Z"
},
{
  "id": "64d91c42d8979e1f30a12348",
  "title": "Workout Plan",
  "content": "Cardio and strength training",
  "userId": "64d91c42d8979e1f30a12345",
  "createdAt": "2024-12-13T16:00:00.000Z",
  "updatedAt": "2024-12-13T16:30:00.000Z"
}
}
```

Assignment8

8. Get a note by its id. (Only the owner of the note can make this operation) (Get the id for the logged-in user from query params) (0.5 Grade)

- URL: GET /notes/:id => /posts/64a3baf1e567890124

```
{
  "id": "64d91c42d8979e1f30a12348",
  "title": "Workout Plan",
  "content": "Cardio and strength training",
  "userId": "64d91c42d8979e1f30a12345",
  "createdAt": "2024-12-13T16:00:00.000Z",
  "updatedAt": "2024-12-13T16:30:00.000Z"
}
```

```
{
  "message": "Note not found"
}
```

```
"message": "You are not the owner"
```

9. Get a note for logged-in user by its content. (Get the id for the logged-in user from query params).(0.5 Grade)

- URL: GET /notes/note-by-content => / notes/note-by-content?content=Workout Plan

```
{
  "id": "64d91c42d8979e1f30a12347",
  "title": "Shopping List",
  "content": "Buy groceries and snacks",
  "userId": "64d91c42d8979e1f30a12345",
  "createdAt": "2024-12-14T10:00:00.000Z",
  "updatedAt": "2024-12-14T10:30:00.000Z"
}
```

```
{
  "message": "No note found"
}
```

10. Retrieves all notes for the logged-in user with user information, selecting only the “title, userId and createdAt” from the note and the “email” from the user.(Get the id for the logged-in user from query params)(0.5 Grade)

- URL: GET /notes/note-with-user

```
{
  "_id": "64a3baf1e567890123",
  "title": "Note 1",
  "userId": {
    "email": "user1@email.com"
  },
  "createdAt": "2024-12-01T12:00:00Z"
},
{
  "_id": "64a3baf1e567890124",
  "title": "Note 2",
  "userId": {
    "email": "user1@email.com"
  },
  "createdAt": "2024-12-02T14:30:00Z"
},
{
  "_id": "64a3baf1e567890125",
  "title": "Note 3",
  "userId": {
    "email": "user1@email.com"
  },
  "createdAt": "2024-12-03T10:15:00Z"
}
}
```

11. Using aggregation, retrieves all notes for the logged-in user with user information (name and email) and allow searching notes by the title. (1 Grade)

- URL: GET /notes/aggregate => /notes/aggregate?title=Code Review Notes

```
{
  "title": "Code Review Notes",
  "userId": "64d91c42d8979e1f30a12345",
  "createdAt": "2024-12-09T15:30:00.000Z",
  "user": {
    "name": "user1",
    "email": "user1@example.com"
  }
}
```

12. Delete all notes for the logged-in user. (Get the id for the logged-in user from query params) (0.5 Grade)

- URL: DELETE /notes

```
{
  "message": "Deleted"
}
```

Assignment8

Important Notes about postman

1. Name the endpoint with a meaningful name like 'Add User', not dummy names.
2. Save your changes on each request (ctrl+s).
3. Include the Postman collection link (export your Postman collection) in the email with your assignment link

Bonus (2 Grades)

How to deliver the bonus?

- 1- Solve the problem [Longest Common Prefix](#) on **LeetCode**
- 2- Inside your assignment folder, create a **SEPARATE FILE** and name it "bonus.js"
- 3- Copy the code that you have submitted on the website inside "bonus.js" file
